Niwesh Waiba

Bagmati Zone, Nepal niweshwaiba@gmail.com 9866332606 in/niwesh-waiba niwesh.com.np/

SUMMARY

Quality Assurance professional with expertise in **US healthcare systems**, specializing in **insurance and claims processing**. Skilled in ensuring **accuracy, compliance, and reliability** of healthcare applications, with knowledge of **HIPAA** and regulatory standards.
Proficient in **manual and automation testing**, designing and executing test cases to validate **data, workflows, performance, and software functionality**, with exposure to **Playwright**. Strong foundation in **data engineering**, including **Python, SQL, ETL workflows, Apache Airflow, and cloud environments**, bridging QA and data-driven insights.
Experienced in **Agile/Scrum environments**, contributing to cross-functional teamwork, sprint planning, and iterative delivery of high-quality solutions.
Committed to **continuous learning** and expanding expertise in **QA methodologies and automation frameworks**.

EXPERIENCE

Associate Software QA Engineer

Claros Analytics — **April 2025 - Present, Princeton, United States · Hybrid**

- Assure quality and control of US healthcare applications, focusing on insurance and claims workflows to ensure accuracy and compliance.
- Design, execute, and maintain test cases to validate application functionality, performance, and data integrity.
- Collaborate with Agile/Scrum teams, contributing to sprint planning, daily standups, and iterative delivery of high-quality solutions.
- Monitor data workflows and gain exposure to Snowflake and Salesforce for cloud-based data systems.
- Maintain test documentation and implement QA best practices, including exposure to Playwright for automation testing.

Software Quality Assurance Intern

Claros Analytics — **December 2024 - March 2025, Princeton, United States · Remote**

- Performed manual testing and smoke testing of applications to ensure core functionality.
- Participated in the Software Development Life Cycle (SDLC) and contributed to Agile team activities.
- Collaborated with team members in Agile/Scrum environment to deliver tasks iteratively.
- Documented test cases and reported defects to support quality assurance processes.

Data Engineering Fellow

Symbiosis Solutions — **September 2024 - November 2024, Kathmandu, Bagmati, Nepal · Hybrid**

- Built and maintained ETL pipelines to extract, transform, and load data for Hackademia projects.
- Ensured data quality and integrity through cleaning, validation, and transformation processes.
- Worked with Python, SQL (PostgreSQL, SQLite), and Apache Airflow to manage and optimize data workflows.
- Gained experience with cloud platforms to support scalable data infrastructure.
- Documented processes and collaborated with teams to improve data-driven project outcomes.

Operations Lead of KIST HackFest 2024 (Organizing Committee Member)

KIST College & SS — **June 2024 - June 2024, Kamalpokhari, kathmandu**

- As the Operations Lead for KIST HackFest 2024, I managed the execution of the event, coordinated sponsor relations, and ensured all necessary resources were in place for the three-day Hackathon. I also played a key role in organizing mentors and facilitating the final results, leading to a successful and impactful event that engaged participants from multiple institutions.

Github Trainer

KIST College & SS — **March 2024 - March 2024, Kamalpokhari, Kathmandu**

- Gave Github training to BIM 1st Semester students. (5 Days training)

Math Teacher

Srijana English School — **2019 - 2020, Gokarneshwor - 5, Kathmandu**

- Worked as a full time math to teacher from class 4 to 7.

PROJECT

Bank Marketing Dataset Cleanup | Data cleaning and formatting for enhanced analysis.

github.com/Niwesh-waiba/Bank-Marketing-Dataset-Cleanup

- Tech Stack: Python, Pandas, NumPy, CSV.
- Subset and cleaned the bank_marketing.csv dataset to create three structured CSV files: client.csv, campaign.csv, and economics.csv.
- Utilized Python, Pandas, and NumPy for data manipulation and preprocessing.
- Converted categorical variables to numerical values, handled missing data, and combined date columns for better analysis.
- Ensured data quality and readiness for further exploration and modeling.

Object_Image_Classifier-using-Tensorflow | Model to Classify Object images

github.com/Niwesh-waiba/Object_Image_Classifier-using-Tensorflow

- Tech Stack: Python, TensorFlow, NumPy, Pandas, Matplotlib, Jupyter Notebook.
- Developed and implemented a Convolutional Neural Network (CNN) to classify images into multiple object categories.
- Conducted data preprocessing and designed model architecture, training on large image datasets to improve accuracy.
- Evaluated model accuracy and performance metrics, achieving a robust model with 95% accuracy on test data.

2048 Game

programiz.pro/ide/python/C8149A3020?utm_medium=playground&utm_source=python-shared-project-link

- Developed a fully functional 2048 game using Python.
- User-friendly terminal interface with real-time input handling.
- Implemented object-oriented programming principles with a modular `Game` class.
- **Key Skills:** Python, Object-Oriented Programming, Game Logic, Algorithm Design.

PAWS APPLAUSE | Animal Welfare Website

github.com/Niwesh-waiba/pawsApplause

- Tech Stack: Python, Django, SQLite, HTML, CSS, Bootstrap, JavaScript.
- Designed and implemented a web application to support animal welfare initiatives and community engagement.
- Ensured a responsive design using Bootstrap for compatibility across various devices.
- Managed data storage and retrieval with SQLite for efficient database operations.

EDUCATION

Bachelor, Information Management (BIM)

Tribhuvan University • 2024

Science (Computer)

ST. LAWERENCE COLLEGE • 2019

CERTIFICATIONS

Become a Python Master

Programiz • 2025

Agile Scrum Foundation

Simplilearn • 2024

Advanced SQL for Data Engineering

365 Data Science • 2024

Data Engineering in Python (Career Path)

Symbiosis Solutions • 2024

Professional Diploma in Software Testing & Quality Assurance

Udemy • 2024

Test Driven Development: Build software with confidence

Udemy • 2024

AI Bootcamp

Hackademia • 2024

Certificate of completion - Introduction to Data and Data Science

365 Data Science • 2022

SKILLS

Quality Assurance & Testing: Quality Assurance & Quality Control of applications, Testing methodologies (manual & automation basics), Test case design & execution, Playwright (automation exposure), Data Validation, Agile & Scrum practices

US Healthcare Domain Expertise: US Healthcare Systems, Insurance & Claims Processing, Regulatory Compliance (HIPAA awareness), Data validation in healthcare workflows

Data & Engineering Skills: SQL (PostgreSQL, SQLite), ETL processes & pipelines, Data validation & quality assurance, Python (scripting & basic data workflows), Apache Airflow (workflow orchestration), Cloud concepts / Snowflake & Salesforce exposure

Project & Process Skills: Documentation & reporting of QA processes, Collaboration in cross-functional Agile teams, SDLC understanding, Agile & Scrum practices
